Acronym

SREF: Self Reliance Empowerment Foundation

Terms & their Meaning

Brain Drain: the emigration of highly trained or qualified people from a particular country to escape from poverty and not returning to their native country where their training and skills could uplift their families and communities at large.

Daakye Kɛsɛɛ: " is an Akan (Twi) phrase that translates to "A Great Future" or "A Significant Future".

OUR VISION AND MISSION

We are committed to breaking barriers and fostering self-reliance among underprivileged individuals and communities in Ghana and beyond.

Our Vision:

We envision a world where education and skill development are accessible to all, enabling people to achieve their full potential and create positive impacts in society.

Our Mission:

Our mission is to equip the less privileged with the knowledge and skills needed to become self-reliant. We focus on fostering sustainable growth by empowering individuals and communities to overcome challenges and thrive.

OUR CORE VALUES

At the Self-Reliance Empowerment Foundation (SREF), our mission is anchored in values that drive sustainable impact across communities:

INCLUSIVITY

We welcome and support individuals regardless of race, religion, gender, or background.

EMPOWERMENT

We provide the tools and resources to help people achieve independence and confidence.

SUSTAINABILITY

We emphasize long-term solutions that lead to lasting development.

MESSAGE FROM OUR BOARD CHAIRMAN

It has been a challenging opportunity for me to assume the role of Chairman of the Board of Trustees (Directors) for Self Reliance Empowerment Foundation (SREF) in February 2025. The past 11 months have given me the opportunity to stretch my personal resources and talents. For my perspective also as a co-founder of SREF I have seen some significant improvement during 2024 and 2025 in how executives, staff, volunteers and donors have helped take our Mission Statement from words to actions.

ROBERT ARCHIBALD

Board Chairman

Self Reliance Empowerment Foundation

“It becomes a challenge for all of us at SREF to translate the many hours of service and donated funds into quantitative outcomes affecting the lives of beneficiaries most efficiently. Part of that challenge lies in trying to describe a “work in progress” as if it were a finished work.

Achievements in bringing educational opportunities to young adults are dear to my heart. Helping to diminish the so called “Brain Drain” in Ghana is being accomplished. Through SREF’s enabling on-line education to grow by one donated laptop at a time several bright and talented beneficiaries have stayed in Ghana. Thanks to donors of used laptops and funds in 2025 we have experienced significant progress over 2024. I am optimistic that we will also easily exceed our progress of 2025 with the planned initiatives for 2026.

Demanding clear, easily understandable financial reports in how donated funds have been used in 2025 has been an ongoing expectation from the Board of Trustees. This governing oversight is finally bearing fruit as evidenced by improved 2025 year end reports.

Projecting a future vision becomes much easier with a demonstrated past as reference. It is my hope and expectation that the year 2026 will demonstrate that SREF and its mission have become sustainable.

BOARD OF DIRECTORS

The Board of Trustees is the highest governing body of the Self Reliance Empowerment Foundation. Comprising a diverse group of professionals, they provide strategic direction, governance, and financial oversight to ensure the organization fulfills its mission and achieves its long-term vision. Meet the dedicated members driving our efforts toward lasting impact and meaningful change.

MESSAGE FROM GHANA EXECUTIVE DIRECTOR

The year 2025 has been a remarkable one for the Self Reliance Empowerment Foundation. Our accomplishments this year reflect not only the impact of our programs but also the tireless dedication, sacrifice, and vision of our Ghana Executive Management Team and our Board of Trustees. Their commitment to service, often behind the scenes, has turned ideas into meaningful change for vulnerable communities.

EDWARD N. NORTEY

Executive Director
Self Reliance Empowerment Foundation

“ Through our education initiatives, including the **Daakye Kεsee Program**, youth have received mentorship, practical skills training, and access to accredited online education. Many have advanced into further education, workforce readiness, and leadership opportunities—moving from uncertainty to structured pathways for a brighter future. The Back2School Program ensured children returned to school fully equipped, easing caregiver burdens and fostering confidence for academic success.

Our health and wellness efforts reached children, adults, and community members with essential screenings, preventive care, and wellness education. Investments in food security and clean water access strengthened community resilience, supporting both daily living and long-term well-being.

The Godparent Program also reached a meaningful milestone, demonstrating how compassionate, committed partnerships can transform a child’s life. Support for beneficiaries such as Prince Narh shows that consistent care and encouragement create opportunities that would otherwise be impossible.

These achievements are a direct result of the selfless work of our team in Ghana, the guidance of our Board, and the support of our donors, volunteers, and partners. Each hour of service, every decision made with care, and every resource stewarded responsibly has translated into tangible, life-changing impact.

Looking ahead to 2026, SREF remains focused on scaling programs, expanding digital skills training, and creating pathways for education, entrepreneurship, and self-reliance for even more communities. Together, we are building a future of hope, opportunity, and lasting change.

Our Programs

We believe that by providing access to education, skills, and resources, we can empower people to achieve personal and family growth and contribute to societal development.

Medical Mission – Our Medical Mission Program is a life-saving initiative designed to provide free medical care, screenings, and surgical interventions to vulnerable communities in Ghana and Tanzania.

SREF MEDICAL MISSION PROGRAM

The Self Reliance Empowerment Foundation (SREF) Medical Mission Program (2025) is a life-saving humanitarian health initiative designed to provide free, urgent, and otherwise unaffordable medical care to vulnerable populations.

The program focuses on orphans, underserved children, adults, and all registered SREF-documented beneficiaries who face limited access to basic healthcare services.

The 2025 Medical Mission prioritized preventive screenings, early disease detection, health education, referrals, and basic medical support, recognizing health as a critical foundation for self-reliance, education, and long-term economic stability.

Partnerships and Implementation

The 2025 mission was implemented through strategic collaboration with Bencare Pharmacy Group and Volunteers of Onua Wellness (Onua meaning friendship). These partnerships enabled the deployment of qualified healthcare professionals, trained volunteers, and essential medical supplies to ensure safe, ethical, and effective service delivery. Additional institutional and individual donors supported complementary interventions including clean water access, food donations, and public health education, enhancing the overall impact of the mission.

Beneficiaries and Reach

During the 2025 Medical Mission, SREF directly served 390 beneficiaries, consisting of both institutionalized children and community members residing near the outreach locations.

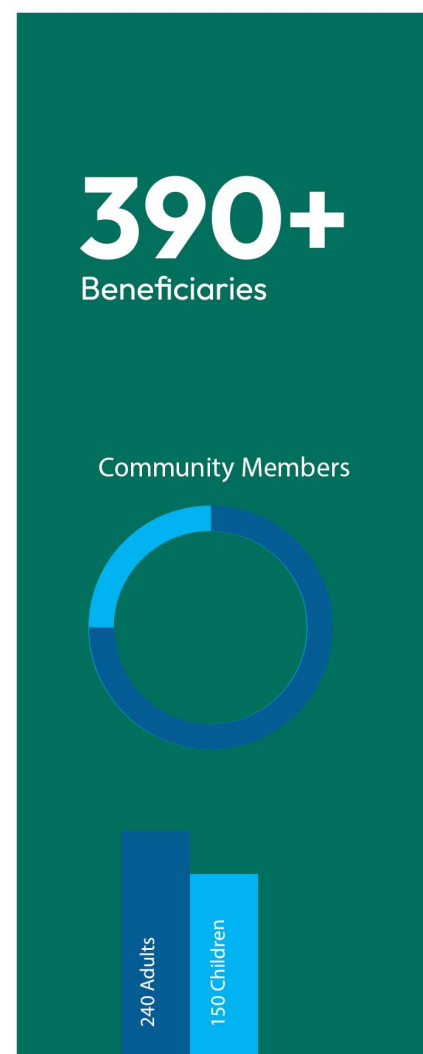

- **240 adults** received medical screenings and referrals
- **150 children** received preventive oral health care and deworming treatment

The mission was conducted at orphanage homes and surrounding communities, ensuring inclusive access to services for both residents and nearby vulnerable populations.

Adult Medical Screenings and Services

A total of 240 adults benefited from comprehensive medical screenings aimed at early identification of common yet often undiagnosed health conditions. Services provided during the 2025 mission included:

- Blood pressure screening to identify hypertension and cardiovascular risk

- Dental and oral examinations, focusing on gum health and infection prevention
- Diabetes screening (HbA1c testing) for blood sugar monitoring and early intervention
- Medical referrals for individuals requiring follow-up care or specialized treatment

These screenings enabled timely identification of health risks and facilitated referrals to appropriate healthcare facilities for continued care.

Child Health and Preventive Interventions

Recognizing the importance of early preventive healthcare, the 2025 Medical Mission delivered targeted services to 150 children, including:

- Oral hygiene education, emphasizing daily brushing and gum disease prevention
- Distribution of toothbrushes and toothpaste to reinforce healthy habits
- Administration of deworming tablets to address parasitic infections common in vulnerable environments

Healthcare professionals educated children and caregivers on how proper oral hygiene helps prevent gum infections, which can otherwise progress into serious oral diseases and systemic health issues.

Health Education and Community Outreach

Health education formed a core component of the 2025 Medical Mission. Structured health talks were delivered to children, caregivers, and community members, covering topics such as hygiene, disease prevention, early medical consultation, and general wellness.

By extending education beyond individual beneficiaries, the mission promoted sustainable behavior change and improved community-wide health awareness.

Outcomes and Observed Impact

The 2025 Medical Mission resulted in measurable and visible outcomes, including:

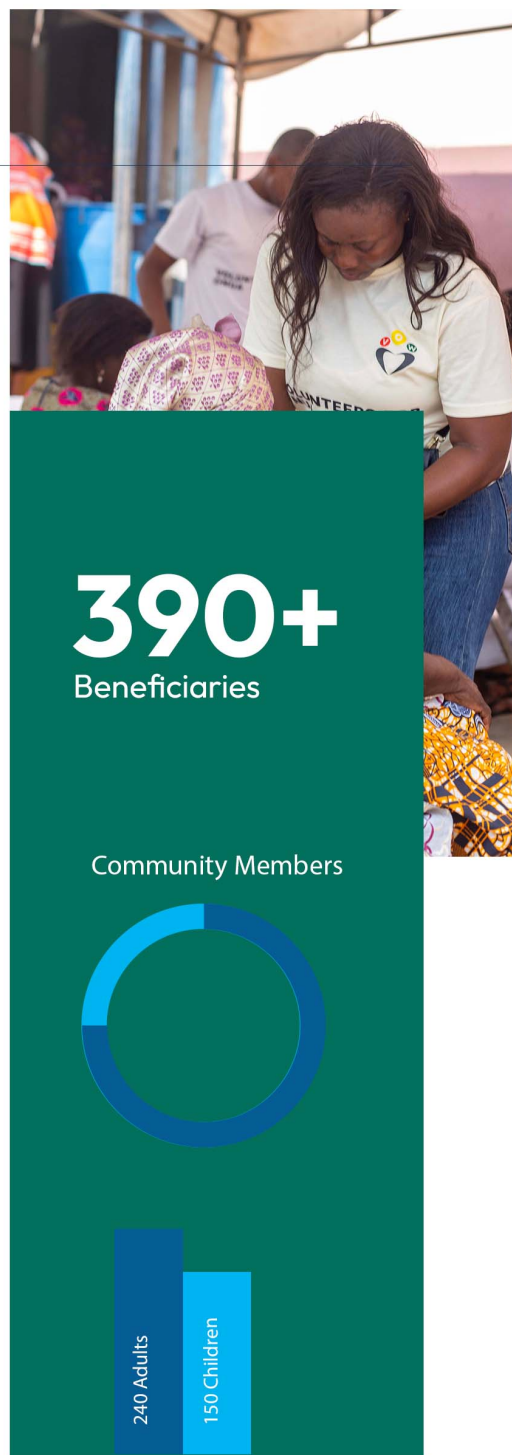

- Early detection of chronic and oral health conditions
- Improved awareness of preventive healthcare practices
- Positive psychosocial impact reflected in joy, relief, and renewed hope among beneficiaries

Feedback from healthcare professionals and community leaders highlighted strong participation, effective coordination, and meaningful impact despite initial logistical challenges.

Conclusion and Future Direction

The 2025 SREF Medical Mission Program demonstrated the Foundation's capacity to deliver high-impact, community-centered healthcare interventions through effective partnerships and accountable implementation. By integrating medical care, health education, and basic needs support, the program contributed to improved health outcomes and strengthened pathways to self-reliance. SREF remains committed to expanding the Medical Mission Program in future years, reaching more underserved communities,

deepening partnerships, and scaling impact. Continued donor, volunteer, and institutional support will be critical to sustaining and growing this life-saving initiative.

Medical Lead Reflection and Impact Summary – Mr. Benjamin Yamuha

Serving as the Medical Lead for the Self Reliance Empowerment Foundation (SREF) 2025 Medical Mission was both a professional privilege and a meaningful humanitarian experience.

With 14 years of medical practice, and in my capacity as Assistant Administrator and Clinical Coordinator at F. K. Affah Community Hospital and Founder of Volunteers for Onua Wellness (VOW), I had the opportunity to coordinate a dedicated team of 15 medical professionals and volunteers who served vulnerable members of the community.

Reflecting on the mission, I can confidently state, it was an excellent experience coordinating the 2025 Medical Mission with the Self Reliance Empowerment Foundation Ghana.”

The program demonstrated strong organization, preparation, and leadership from beginning to end. Medical outreach initiatives of this scale often encounter logistical challenges, but the coordination provided by SREF ensured smooth service delivery.

As I emphasized during the program, “The program was well planned and effectively organized from start to finish.”

Medical Services Delivered

During the mission, our team conducted a range of diagnostic screenings and consultations to assess the general health of the children.

Medical Screening Services

During the mission, our team conducted a range of diagnostic screenings and consultations to assess the general health of the children.

General Medical Consultation

Body Temperature Check

Blood Pressure Measurement

Pulse Rate Assessment

Blood Sugar Testing

Weight & Nutritional Assessment

Dental Examination

Blood Group Testing

Ulcer Symptom Screening

Basic clinical assessment and treatment guidance

Malnutrition and growth monitoring

These screenings allowed us to detect early health concerns and provide preventive guidance or referrals when necessary.

Key Health Findings

One of the most critical discoveries during the outreach was the high prevalence of serious dental conditions among orphanage children.

Dental Health Findings Number of Children Percentage		
Total Children Screened	150	100%
Children with Advanced Dental Conditions	71	47%
Children without Severe Dental Issues	79	53%

The severe conditions we identified included:

- Advanced tooth decay
- Oral mucosal infections
- Tooth mobility
- Structural tooth deterioration
- Multiple untreated cavities

These findings highlighted the urgent need for preventive oral healthcare interventions for vulnerable children.

Preventive Health Support Provided

To address these challenges, SREF implemented several preventive health interventions.

Preventive Support Distributed Total	
Toothbrushes	600
Toothpaste Units	150
Children Receiving Deworming Treatment	150

Each child received four toothbrushes and one full-size toothpaste, and our medical team conducted demonstrations on proper tooth-brushing techniques.

Caregivers were also trained and given toothbrush replacement cycle calendars to help maintain long-term hygiene practices.

All 150 children received deworming medication, accompanied by health education on sanitation and prevention of parasitic infections.

Monitoring and Evaluation Results

Following the outreach, SREF conducted a structured Monitoring and Evaluation (M&E) follow-up to measure the program’s impact

Overall Health Improvement

The improvements were observed across several health areas, including oral hygiene practices, hygiene behavior, and reduced symptoms related to parasitic infections.

Impact Indicator	Outcome
Total Children Evaluated	150
Children Showing Measurable Improvement	134
Overall Positive Outcome Rate	89%

Oral Health Improvements

Caregivers reported noticeable reductions in tooth pain and gum irritation. Follow-up assessments also showed improvements in gum condition, plaque reduction, and overall oral cleanliness.

Dental Follow-Up Results Number Percentage		
Children Initially Diagnosed with Severe Dental Issues	71	47%
Children Showing Improved Oral Hygiene Behavior	63	89%
Children Reporting Reduced Tooth Pain	Majority	Significant

Hygiene Behavior Change

Post-program monitoring revealed significant behavioral improvements:

- Over 90% of the children now brush their teeth at least twice daily, compared to inconsistent brushing habits prior to the intervention.
- Caregivers reported that oral hygiene routines have become part of daily schedules.
- The toothbrush replacement calendar has helped establish structured hygiene management.

Deworming Health Outcomes

Caregivers reported:

- Reduced stomach discomfort among children
- Improved appetite and nutritional intake
- Higher energy levels and increased physical activity

These outcomes demonstrate the effectiveness of combining preventive medication with health education.

Program Efficiency

Operational Indicator	Outcome
Medical Professionals & Volunteers	15
Children Screened	150
Oral Hygiene Kits Distributed	150
Deworming Treatments Administered	150
Overall Positive Health Impact	89%

Conclusion

"I will sayThe SREF 2025 Medical Mission successfully delivered both immediate healthcare services and long-term preventive health benefits to vulnerable children. The 89% positive evaluation outcome demonstrates that the intervention significantly improved hygiene practices, reduced health risks, and strengthened caregiver capacity to support children's wellbeing. I remain grateful for the opportunity to work alongside SREF and look forward to supporting future initiatives that continue to bring essential healthcare to underserved communities".

Living needs of children and caregivers at the orphanage

As part of the 2025 SREF Medical Mission, the Foundation delivered **\$2,500** worth of essential food and household supplies to support the immediate nutritional and daily living needs of children and caregivers at the orphanage.

These supplies provided immediate relief, reduced food insecurity, and ensured caregivers could maintain safe and sanitary living conditions for the children under their care.

This intervention directly strengthened child welfare outcomes by stabilizing daily meals, improving hygiene practices, and easing the financial burden on the orphanage. For many beneficiaries, these provisions represented not only nourishment, but dignity, reassurance, and continuity of care.

The distribution included rice, sugar, baby food, toiletries, biscuits, beverages, and detergents—items carefully selected to address both short-term sustenance and basic hygiene.

CLEAN WATER INITIATIVE: STRENGTHENING WATER INFRASTRUCTURE SYSTEMS

Recognizing that access to clean water is foundational to health, education, and human dignity, SREF implemented a \$4,000 water initiative as part of the 2025 mission. A large poly water storage tank was installed at the orphanage to provide safe, reliable, and sustainable access to clean water.

This intervention significantly improved hygiene standards, reduced the risk of waterborne diseases, and ensured that children have consistent access to clean water for drinking, cooking, bathing, and sanitation. Caregivers reported immediate improvements in daily operations, health routines, and overall living conditions.

Beyond its immediate benefits, this water infrastructure represents a long-term investment in self-reliance, reducing dependency on unsafe water sources and enabling the orphanage to operate more efficiently and sustainably.

Collective Impact and Stewardship

Together, the \$6,500 combined investment in food security and clean water transformed lives in tangible and measurable ways. These interventions complemented the medical screenings and health education delivered during the mission, reinforcing SREF's integrated approach to community development—where health, nutrition, water, and dignity are addressed holistically.

This outreach stands as a powerful example of what is possible through youth-led innovation, cross-border collaboration, and disciplined stewardship of donor resources. Every dollar contributed translated directly into action, impact, and hope.

Appreciation and Call to Partnership

None of these outcomes would have been possible without the generous commitment of SREF's board members, donors, institutional partners, and volunteers. Your support turned vision into reality—bringing healing through medical care, nourishment through food security, and protection through clean water to vulnerable children and caregivers.

As SREF continues its work across Ghana, Tanzania, Idaho, and beyond, we invite you to deepen your partnership with us. The need remains great, the impact is proven, and the opportunity to change lives is real.

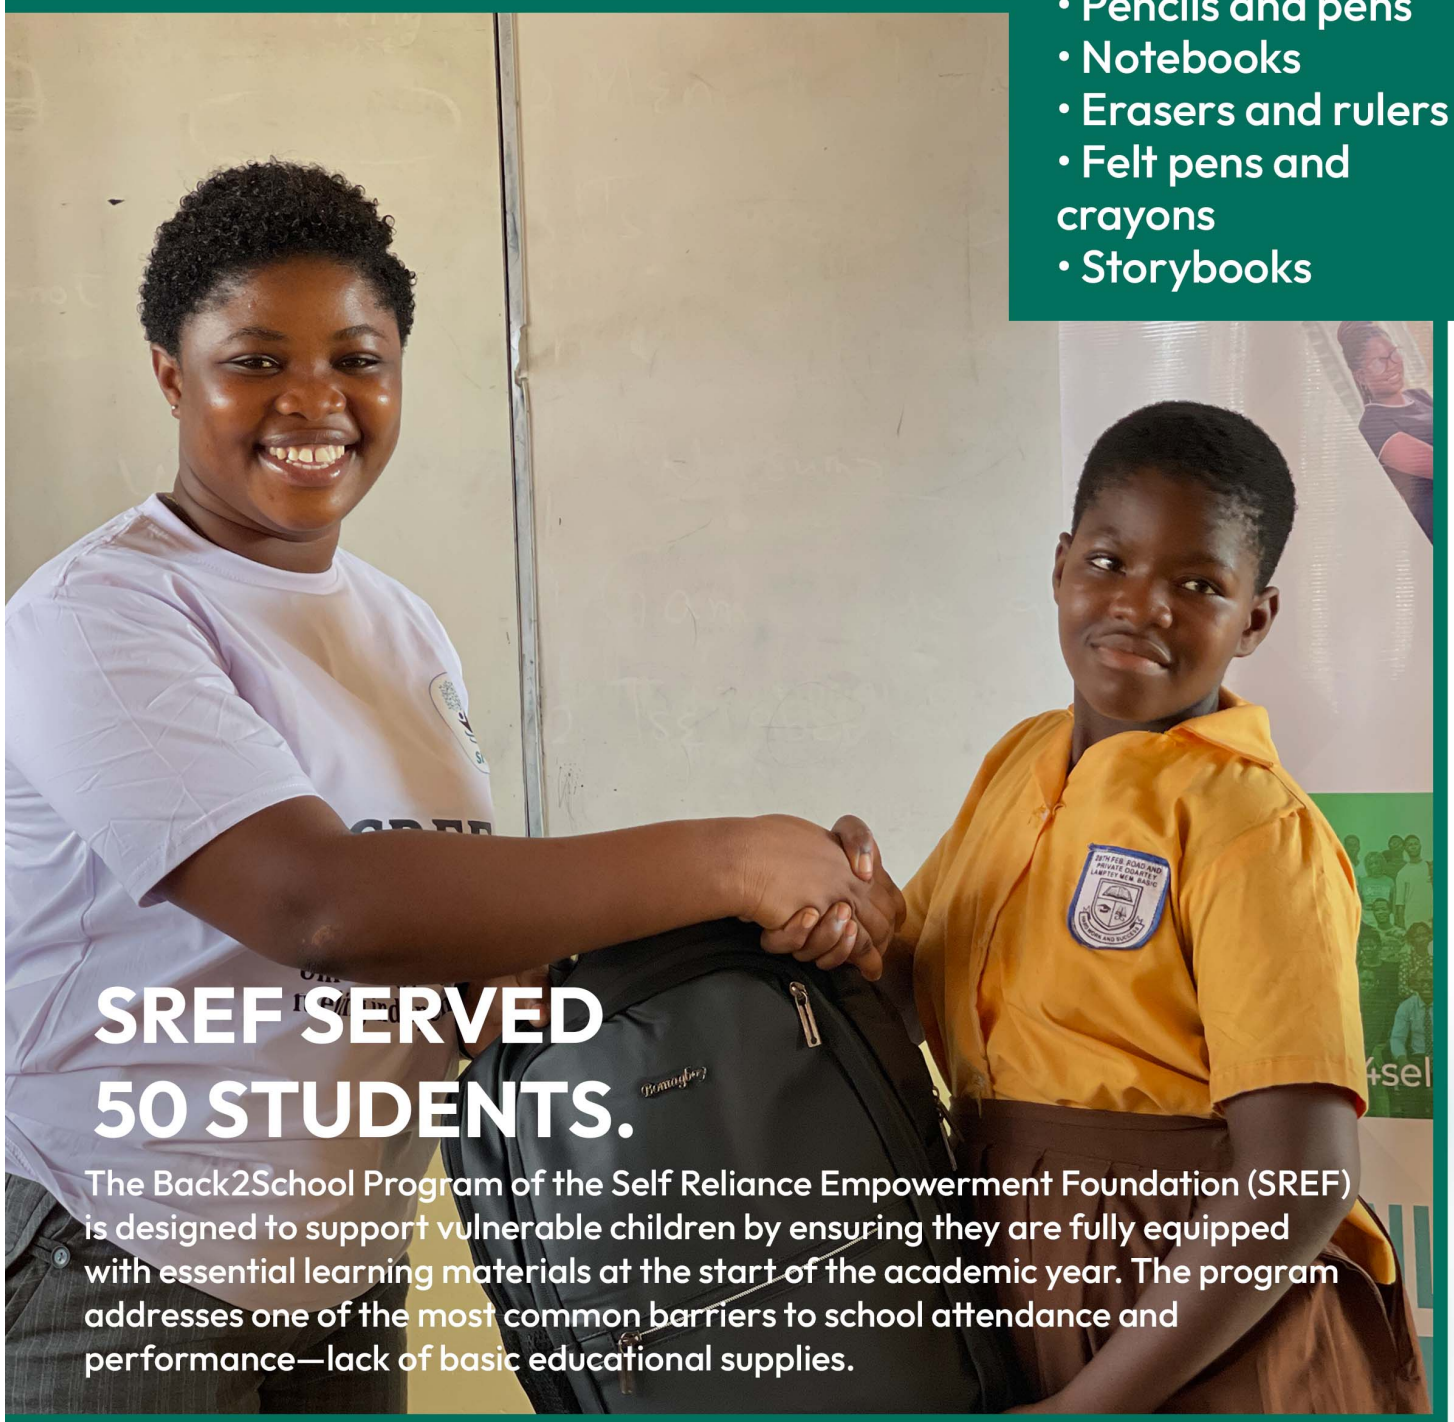

Together, we can build a more self-reliant, compassionate, and hopeful world—one strategic act of service at a time.

BACK 2 SCHOOL

Each beneficiary received:

- School bag
- Pencils and pens
- Notebooks
- Erasers and rulers
- Felt pens and crayons
- Storybooks

**SREF SERVED
50 STUDENTS.**

The Back2School Program of the Self Reliance Empowerment Foundation (SREF) is designed to support vulnerable children by ensuring they are fully equipped with essential learning materials at the start of the academic year. The program addresses one of the most common barriers to school attendance and performance—lack of basic educational supplies.

These materials were carefully selected to meet daily classroom needs, encourage creativity, and support literacy development.

Impacts:

Under the 2025 Back2School Initiative, SREF served 50 students, providing each child with a complete set of school supplies to support effective learning and classroom participation.

Outcomes and Value to Beneficiaries:

The Back2School support reduced the financial burden on caregivers, improved student preparedness, and increased children's confidence as they returned to school fully equipped. Teachers and caregivers reported improved readiness and engagement among supported students, reinforcing the importance of early investment in education.

Donor Impact and Accountability:

Every contribution to the Back2-School Program translated directly into tangible learning tools placed in the hands of children. This initiative demonstrates SREF's commitment to practical, high-impact educational support that strengthens long-term self-reliance and academic success.

Conclusion:

By equipping children with essential school supplies, the Back2School Program helps create an equal starting point for learning, reinforces the value of education, and lays a strong foundation for future achievement. Continued donor support will allow SREF to expand this initiative and reach even more children in need.

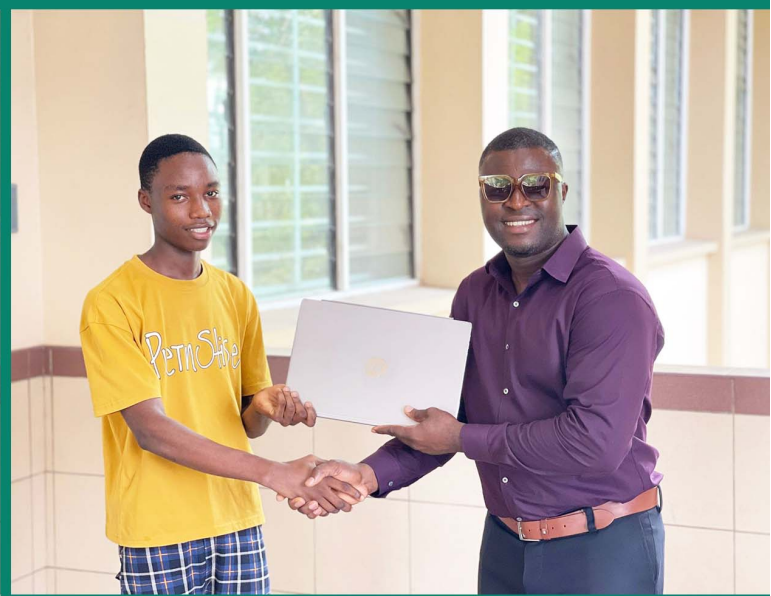

Our Laptop Project; In-Kind Donations – 2025

In 2025, the Self Reliance Empowerment Foundation (SREF) received in-kind donations to support students. These contributions included **11 laptops, 7 tablets**, and related accessories such as chargers, cases, and peripherals, all of which were carefully documented with donor details, serial numbers, and fair market value assessments.

The donated equipment directly supported SREF's education and self-reliance programs by enhancing access to digital learning, online education, and administrative capacity. Every item was responsibly received, recorded, and allocated to programmatic use in alignment with SREF's mission and accountability standards.

These in-kind gifts reduced operational costs, strengthened program delivery, and maximized the impact of donor generosity. SREF is deeply grateful to all contributors whose thoughtful donations helped convert surplus resources into life-changing opportunities for beneficiaries in 2025.

GODPARENT PROGRAM: RECOGNIZING DONOR SUPPORT

The Self Reliance Empowerment Foundation (SREF) is deeply grateful to announce and celebrate the first official Godparent enrollment under our Godparent Program. This milestone marks a meaningful step forward in our commitment to long-term, individualized support for vulnerable children in Ghana.

For just \$4 a
DAY

Through this inaugural subscription, a dedicated godparent committed to annual beneficiary support for Prince Narh, who successfully graduated in November 2025 with full financial clearance. This support covered his education-related expenses, healthcare needs, and essential material provisions, ensuring stability throughout his academic journey and contributing directly to his successful completion of school.

We extend our heartfelt appreciation to our first godparent for believing in Prince Narh and in SREF's mission. Your generosity has helped transform a young life and demonstrated the profound impact one committed individual can make.

The Power of Godparent Support

For just \$4 a day, a godparent can transform the life of a vulnerable child in Ghana. Godparents provide consistent, life-changing support that includes food, shelter, education, healthcare, and essential life skills, enabling street-connected children and orphans to move toward self-reliance and a brighter future.

Being a godparent is more than financial assistance—it is a meaningful relationship built on care, accountability, and encouragement. Godparents are given the opportunity to participate in quarterly progress interviews with their godchild, either in person or remotely.

These engagements allow sponsors to follow the child's growth, celebrate milestones, and witness firsthand the impact of their support.

Our Commitment to Transparency

SREF proudly upholds a 100% Direct Impact Guarantee. We ensure that 100% of every godparent contribution goes directly to the supported child or beneficiary—with no overhead and no deductions.

This commitment reflects our dedication to transparency, stewardship, and donor trust. An Invitation to Make a Difference

The success of Prince Narh's journey stands as powerful evidence of what compassionate partnership can achieve. As SREF continues to expand the Godparent Program, we warmly invite others to join this life-changing initiative.

By becoming a godparent, you are not only supporting a child—you are restoring hope, building confidence, and investing in a future shaped by opportunity and dignity. Join the Self Reliance Empowerment Foundation today and help change a life for just \$4 a day.

DAAKYE K&SE& PROGRAM – 2025 TECH IMPACT FOR BENEFICIARIES

In 2025, the Daakye K&se& Program advanced SREF’s mission of self-reliance by providing mentorship, entrepreneurship preparation, and accredited online education to underprivileged youth. Through disciplined implementation and strategic partnerships, the program produced measurable outcomes in education access, workforce readiness, spiritual and personal development, and employment placement.

A total of 21 beneficiaries were enrolled, all of whom were successfully placed into the BYU–Pathway Worldwide program, ensuring access to affordable, globally recognized tertiary education.

2025 Key Outcomes at a Glance

- **21 beneficiaries** enrolled in the **Daakye K&se&** Program
- **100% enrollment** into BYU–Pathway Worldwide
- **5 beneficiaries** transitioned to serve LDS missions, strengthening maturity, discipline, and self-reliance principles
- **1 beneficiary (Benard)** secured international employment in Dubai through an SREF associate firm
- **15 active BYU–Pathway graduates** receiving ongoing academic and mentorship support toward degree completion

These outcomes demonstrate the program’s ability to move beneficiaries from vulnerability to structured pathways of education, employment, and leadership.

Education Pathways Supported

Current beneficiaries are pursuing or preparing for market-relevant associate and bachelor’s degrees, including:

Bachelor’s Degree Pathways

- Applied Business Management
- Applied Health
- Communication
- Family and Human Services
- Information Technology
- Professional Studies
- Software Development

Associate Degree Pathways

- Accounting
- Applied Business Management & Health
- Communication
- Family and Human Services
- Family History Research
- Information Technology
- Professional Studies

The **Daakye Kɛsɛɛ** Program is a holistic youth empowerment initiative built on a **three-pillar model**:

Mentoring → Entrepreneurship → Online Education

SREF's philosophy is clear:

Education alone is not sufficient. Sustainable self-reliance requires mindset formation, practical skills, and accessible accredited education working together.

Daakye Kɛsɛɛ addresses both personal and structural barriers that prevent capable youth from achieving long-term economic independence.

Donor Value & Strategic Impact

The Daakye Kεsee Program is not charity—it is a structured investment in human capital.

In 2025, donor support directly translated into:

- Education access
- Employment placement
- Leadership development
- Reduced youth unemployment
- Long-term self-reliance

SREF is building a pipeline of educated, skilled, and values-driven leaders capable of transforming their communities.

2026 Goals: Looking Ahead

- Expand beneficiary enrollment
- Launch digital skills training
- Increase international employment placements
- Strengthen donor-supported entrepreneurship funding
- Scale mentoring capacity

Daakye Kεsee is a proven gateway from vulnerability to self-reliance—and with continued donor partnership, its impact will multiply.

Financial reports:

SREF received the blessing of having 19 individuals support its mission with monetary donations. Over 30 individuals donated thousands of hours promoting, conducting and evaluating SREF's process. SREF achieved increased stability with the financial resources from 3 partner institutions. Specific details of the amounts of money and in-kind donations will be available as part of the annual audit report as explained in the Annual Audit.

Annual Audit

SREF uses the most stringent requirement for auditing—Ghana's mandatory annual statutory audit for all non-profits under the Companies Act, 2019 (Act 992)—as its global standard to ensure total compliance across all jurisdictions (USA, Ghana, and Tanzania). An external audit is therefore performed annually by an independent accounting firm regardless of transaction volume.

A summary of that annual audit is available on the Self-Reliance Empowerment Foundation (SREF) website <https://help4selfreliance.org/reports/> by June 30 the year following SREF's fiscal (calendar) year.

For the year 2025, that report will be posted by June 30, 2026.

Thanks to the generous support of our donors and the tireless efforts of our team in Ghana, SREF successfully advanced our mission to empower underserved communities through education, skills training, and self-reliance initiatives. Every dollar was strategically deployed to maximize measurable outcomes and long-term community benefits.

Our 2026 Growth

This growth will enable SREF to expand program reach, enhance operational capacity, and continue creating sustainable gateways to lift families and individuals out of poverty within our communities.

We express our heartfelt gratitude to all donors, partners, and supporters. Your commitment is the foundation of our success and fuels the transformation of lives across Ghana and Tanzania.
